

# Empowering Purpose Master Class

An immersive 6 week journey exploring purpose through the art of deep reflection and meaningful conversation.

# Ready to go deep into your purpose?

# Welcome to Empowering Purpose.

Conscious leaders are mission driven. They long to bring service to the world and help build a better future. But how do we know and ensure that the impact we bring is truly conscious?

This 6-week immersive journey helps you connect with your deeper why whilst shining light to hidden drivers of your actions. Together, we create the change we most want to see in the world.

Purpose is not just about action. It is also about what compels us to act. This Master Class uniquely combines weekly self-reflection exercises with open, vulnerable conversations in a professionally facilitated Trust Circle. In small groups of up to 8 peers, you will learn to bring deep curiosity and courage to what truly drives you in the world.

You will be invited to appear with humility and engage with uncertainty, and asked to face whatever inner discomfort this surfaces.

And then, as you transform in the face of, and through the connection with these peers, insights will surface around your purpose that will transform the course of your actions.

## Program

#### Module 1 Kick-off

Connect with the wider tribe that is embarking on this Empower your Purpose journey with you during this group kick-off event.

### Module 2

## Starting with Why

Dive deeper into the Why of your purpose question during your first Trust Circle. Can you bring not just your head but also your heart?

#### Module 3

### Above and below the line

As you dive deeper into your real drivers, learn to use a model – Above and Below the Line – to grow your purpose and impact.

## Module 4 Taking responsibility

Explore what happens when you bring the power of silence, deep listening and curiosity to your purpose conversations.

### Module 5

#### The shift from Me to We

As you open up to the wisdom of others, a shift occurs from Me to We. From here we can face the complexity of real-world challenges.

## Module 6

## Bringing purpose alive

Let's bring our acquired insights and skills into action. What will be our experiment as we move into the wider world?
